TITLE : SOLAR CELL TILE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a solar cell tile which is easily maintained and reducible in thickness.

SOLUTION: The solar cell tile 10 is equipped with a case 11 consisting of a case main body 20 and a lid member 30, a solar cell part 12 arranged in the case 11, a light emitting diode 13 arranged in the case 11, and a driving means 14 which is at a different plane position in the case 11 from the light emitting diode 13 and turns on the light emitting diode 13 with electricity generated by the solar cell part 12. The maintenance can be facilitated and the thickness can be made as thick as a decoration tile by arranging the driving means 13 and light emitting diodes 13 at the different plane positions.
